WINCHESTER, VA., January 21, 1911. A romance which started on the high seas while Uncle Sam's battle fleet was on its journey around the world several years ago culminated in the marriage a few days ago at Chicago of Miss Agatha Minghini, member of an old and prominent family of Martinsburg, W. Va., and Charles Skinner of Kansas City, Mo., who recently quit the during the cruise, and when the latter wrote letters to his sister Skinner was permitted to drop brief notes into the envelopes, which resulted in Miss Minghini writing to him. No Water for Fish.

The game warden of Jefferson county, W. WOMEN SEEK EQUAL RIGHTS.

Members of Episcopal Church in Kentucky Want Say in Councils. Special Dispatch to The Star.

LEXINGTON, Ky., January 21 .- New suffrage ideas have appeared here. The women of the Episcopal diocese of Kentucky are demanding that they be admitted to full dights with the laymen of the church in the diocesan councils. They have selected Miss Laura Clay of Lexington, president of the Kentucky Equal Rights Association, and auditor of the National American Women Suffrage Association, to lead the campaign.

The women declare they pay duties and pew rent and are attendants at services the same as the men, and should have equal rights. Miss Clay is the only living daughter of the late Gen. Cassius Clay.

CREAM, MILK

Many epidemics of typhoid have been traced to raw milk. (Kober.) In the typhoid epidemic of Cassel in 1909 (over 300 cases within 10 days), only those who drank raw milk contracted the disease. (Heinemann.)

In hospitals where a change was made from raw to properly pasteurized milk typhoid conditions immediately improved and the mortality rate decreased. (Edsail.) Typhoid is less frequent in countries where little raw milk is used. (Berliner.) It has been found that among patrons of dairies supplying properly pasteurized milk and cream there occur but very few cases of typhoid. (Rosenau.)

Disease germs rise with or cling to the cream, which contains at least twelve times as many bacteria per volume as the whole milk from which it was separated. In Japan where little cows' milk is used scarlet fever is practically unknown. (Hail.)

Milk trusts and others have spread the reports that pasteurizing was harmful.

Able sanitarians have often disproved this. Children and persons in a rundown condition should not drink raw milk and cream; it is rarely safe to do so.

Properly pasteurizing means heating to 140 degrees Fahrenheit for twenty min-utes. Home pasteurizing is just as effi-cient. Commercial pasteurization is un-Either buy only properly pasteurized milk and cream or home-pasteurize it by bringing it to near boiling, then cool and keep cold and covered until used.
